As far as I can see and use "Office 2013-2019 C2R Install Lite v6.5.0" the microsoft office works just fine , I could send you a sample file to test if you like, so you can write an article about it... I'd like to ask if we can use it for free ? This is a great software, so why does it cost \$39.99 when it can be done for free? I'm just testing your software, but I'm amazed at what it can do! It is so amazingly simple, yet so powerful! If you don't mind my asking, how much does this cost? I'd love to buy it, but I'd like to hear if there are any alternatives or if you offer a family discount or something. Thanks! I tried Office 2013-2019 C2R Install Lite v6.5.0 and it works perfectly! Great toolset that is simple and easy to use! Thank you for sharing with us. Thanks for the update of the program. It works fine with the 2019 update of Office. The only things I have noticed are... - When using the *.iso file, it is not possible to use an USB stick to create a bootable stick, it says that the software cannot be used because of an update. - It also does not work on a Win-10 machine. I have tried to use the *.exe file in wine but its not possible to start it with wine, so I can't test if it works fine there.
